

## CARTON PACKING

The packing instructions are designed to provide consistent standards among all of our vendors. This consistency ensures fast service throughout the warehouse & distribution center and to the associates working in our stores.

### Purchase Order

Each carton is to contain one purchase order. Do not place two purchase orders together in a carton. Purchase orders must ship complete.

### Fold

Each item must be folded individually. Size of the fold is a product/division specific standard. Confirm fold size with buyer prior to packing.

### Poly Bags

Poly bags are required for all merchandise. If the order is for a solid size, then each piece must be wrapped individually. If the order is for a prepack, then the prepack may be placed in one sealed poly bag.

### Inner Boxes

Inner boxes are required for selected bulk (solid size) merchandise.

- If an inner box is required, the box top must properly fold into the box. An inner box-end label is required for each inner box. Placement of label is on the lower-right front end of the box.
- If an inner box is not required, the item will remain in the poly bag. A barcoded bag-end label must then be placed on the lower-right front of the poly bag.

(Barcode symbology is c128 std)

### Inner Packs

When product is prepacked as a multiple pack with a distribution quantity greater than one unit, the barcoded bag-end label must be placed on the lower-right front of the poly bag.

(Barcode symbology is c128 std)

## Carton Packing

\*\* Note: The requirement for box / bag end labels does not apply to prepack orders (multiple size cartons). Inner boxes are not used for prepack orders.

\*\* Note: The requirement for box / bag end labels does not apply to mark-for-store orders (mixed style/color/size cartons). Inner boxes are not used for mark-for-store orders.

### Hangers

Some garments may ship on hangers, but must be pre-approved by the buyer. Garments must still be shipped in cartons meeting PVH Corp. standards.

### Carton Size

Utilize the appropriate size carton for the merchandise being shipped, staying within the PVH Corp. carton specifications (Refer to chapter 9 – Carton Specifications).

### Fragile Items

Cartons containing fragile items must be stamped with a "Fragile" sticker.

### Shrink Wrap

This is forbidden on all PVH Corp. shipments - except by permission from the receiving distribution center.

## DIRECT TO STORE

PVH Corp. will issue Prepack or Bulk orders to the supplier. PVH Corp. may choose to pack the cartons one of two ways based on purchase order type. All cartons must meet PVH Corp. specifications.

### 1. Prepack Purchase Order

- Conforming cartons must contain the exact same assortment of style, color and size specified on the PVH Corp. purchase order. Each prepack carton must be shipped individually. The supplier may not master pack if there is more than one prepack allocated per store. Nonconforming cartons are not accepted for prepack purchase orders with a ship date of 2/25/2021 or later.

## 2. Bulk Purchase Order

- The supplier may combine styles, colors and sizes in a carton based on the PVH Corp. allocation by store. The supplier will determine the most efficient way to pack cartons that ship to a store. Each carton will be classified as nonconforming and must be labeled accordingly.

### WAREHOUSE & DISTRIBUTION CENTER

Prepack, as well as solid carton (case pack) purchase orders may be shipped to PVH Corp. warehouse & distribution center. The units per carton are dictated by the buyers at time of purchase. PVH Corp. may choose to pack the cartons one of two ways based on PO type:

1. **Solid Carton (case pack)** – One style, one color, one size
  - Conforming cartons contain the exact quantity specified on the purchase order. Make as many conforming cartons as possible. Excess units may be packed as a nonconforming carton and properly labeled (Refer to Chapter 11- Carton Label Requirements).
2. **Prepack** – Predetermined assortment of style, color and size
  - Conforming cartons contain the same quantity and assortment of style, color and size. Nonconforming cartons are not accepted for prepack purchase orders with a ship date of 2/25/2021 or later.

### MARK FOR STORE (ONLY FOR EDI VENDORS WHO ARE TESTED AND APPROVED FOR MARK-FOR-STORE SHIPMENTS)

PVH Corp. will issue Bulk orders as mark-for-store shipments. Mark-for-store orders require the merchandise to be packed by store and shipped to the warehouse. All cartons must meet PVH Corp. specifications.

- The supplier may combine styles, colors, and sizes in a carton based on the PVH Corp. allocation by store. The cartons must stay within the warehouse carton dimension and weight requirements. Any cartons that may not meet the minimum dimension and weight requirement should be addressed with the PVH Corp. division.

### Master Carton

This is allowed only if shipped direct to a store. It is *prohibited* if shipping to the Jonesville warehouse & distribution center.

If master carton is shipped, it must conform to size requirements and be marked "Master", along with sender name and address, PVH Corp. purchase order number, and carton shipped.

### Conforming Carton

**Non- Conforming Carton**
